Dataset	Variable Name	Variable Label
Stores	store_name	Store name
Stores	store_id	Store ID (PK)
Stores	city	Store city
Stores	store_type	Store type
Products	product_id	Product ID (PK)
Products	product_name	Product name
Products	category	Product category
Products	unit_cost	Cost per unit
Products	retail_price	Retail price per unit
Products	sub_category	Product sub category
Campaigns	campaign_id	Marketing campaign identifier
Campaigns	channel	Marketing channel
Campaigns	budget	Marketing campaign budget
Orders	order_id	Order identifier
Orders	customer_id	Customer identifier
Orders	store_id	Store ID (PK)
Orders	product_id	Product ID (PK)
Orders	profit	Profit
Orders	net_sales	Net sales after discount
Orders	gross_sales	Gross sales before discount
Orders	campaign_id	Marketing campaign identifier
Orders	order_date	Date order was placed
Orders	return_status	Order return status
Orders	discount_pct	Disount
Orders	discount_amount	Discount Amount
Orders	profit_margin	Profit divided by net sales, expressed as a percentage
Orders	campaign_status	Whether an order is tied to a marketing campaign
Orders	order_year	Year extracted from order_date
Orders	order_month	Month number extracted from order_date
Customers	customer_id	Customer identifier
Customers	income_bracket	Household income bracket
Customers	loyalty_tier	Loyalty program tier
Customers	join_date	Date joined loyalty program
Customers	gender	Customer gender
Customers	age	Customer age

Variable Type	Final Pandas Storage Type
categorical (nominal)	category
categorical (nominal)	category
categorical (nominal)	category
categorical (nominal)	category
categorial (nominal)	category
categorical (nominal)	category
categorical (nominal)	category
continuous (ratio)	original numeric dtype (not converted)
continuous (ratio)	original numeric dtype (not converted)
